McBride

CROSS INDUSTRY SOLUTIONS AND SUPPORT FOR YOUR TRANSFORMATION, OPERATIONS & TECHNOLOGY NEEDS

WHAT WE DO

- MANAGEMENT CONSULTING
- INTEGRATED IT SERVICES
- OPERATIONS SUPPORT SERVICES
- ORGANIZATIONAL TRANSFORMATIONS

ENGINEERING SOLUTIONS & AMPLIFYING OUR CLIENTS' VISION BY LEVERAGING OUR PUBLIC SECTOR EXPERIENCE

Company Overview

McBride is an SBA-certified Service-Disabled Veteran-Owned Small Business (SDVOSB) management and IT consulting firm with significant professional services experience that includes program and project management, strategic planning and analysis, risk management, change management, grants management, financial and budgetary analysis, strategic communications, cyber security, logistics, systems engineering, policy and governance, and digital transformation. McBride brings extensive experience with commercial, federal, state, local, and multinational organizations within multiple sectors.

Core Competencies

TRANSFORMATION

- Strategic Assessments
- Operating Model Design
- Business Process Improvement
- Change Management
- Digital Transformation

OPERATIONS

- Program Management
- Oversight Support
- Data Analysis
- Finance & Budgeting
- Disaster Recovery

TECHNOLOGY

- Requirements Gathering
- Workflow Design
- Agile Coaching
- Shared Services

McBride

KEY FEDERAL PAST PERFORMANCES

U.S. Air Force

Serving the Air Force, we provide logistics, program management, systems engineering, and cyber security:

- **Logistics** | Lead and support logistics requirements with a focus on acquisitions and contacts management.
- **Program Management** | Manage foreign military sales (FMS) acquisitions for the Air Force.
- **Systems Engineering** | Provide a broad theoretical and practical knowledge of system engineering to the acquisition process.
- **Cyber Security** | Support penetration tests, vulnerability assessments, and security reviews and audits for the Air Force.

U.S. Navy

Serving the US Navy since 2019, we have provided business process improvement, shared services, and data analytics:

- **Strategic Communications** | Developed strategic updates, monitored training, developed correspondence for stakeholder management, and managed day-to-day communications.
- **Product Support** | Functional Product Owner coordination, exercise planning, risk analysis and reporting helped facilitate the deployment of a responsive, transformed personnel and pay solution for the US Navy.
- **Process Design** | Facilitated Future State Design sessions with client to map existing workstream processes into their CRM.

NATO Communications and Information Agency (NCIA)

Serving NCIA since 2019, we provide cyber security, engineering support, QA and IV&V, and military operations support:

- **Cyber Defense Support** | Performed cryptography security, penetration tests, vulnerability assessments, and security reviews and audits. Managed cryptography material and ensured crypto material was issued appropriately to cleared individuals
- **Engineering Support** | Developed and maintained Systems Engineering products and coordinated with Stakeholders. Developed Mission/Test Cards, briefings, checklists, cheat sheets, and aides covering ACCS software evolutions
- **Quality Assurance and Independent Verification and Validation (IV&V)** | Analyzed operational and management processes and system controls' effectiveness, identified process weaknesses, and provided support for report recommendations for improvement.
- **Military Operations Research, Analysis, and Support** | Provided military operations expertise support to the Operational Analysis Business Area, including defense planning and analysis.

Federal Transit Administration (FTA)

Serving FTA since 2018, we have provided process optimization, IT, and organizational change management in the following ways:

- **Grants Program Oversight** | Identified programmatic ambiguities, redundancies, and inconsistencies within FTA's current oversight approach and developed guidance to mitigate or eliminate these issues in future workstreams.
- **Process Improvement & SharePoint Development** | Supported the development, implementation, and administration of a new SharePoint site. Our team created multiple training documents, including a detailed end user and SharePoint administrator
- **Project Management** | Developed and oversaw the management of a Risk Evaluation Tool (RET), Implementation Plan (IP) tool, mission critical process standard operating procedures (SOPs), and overall program management.

Centers for Disease Control and Prevention (CDC)

Serving the CDC since 2021, we have provided strategic planning, fiscal oversight, and internal controls support in the following ways:

- **Strategic Development** | Created a measurable and actionable strategic plan to advance the capabilities, processes, and interests of the Working Capital Fund.
- **Financial Management** | Developed a 3-year fiscal roadmap for the Working Capital Fund to reach a fully capitalized future.

Department of the Interior (DOI)

- **PMO Optimization** | Created a prioritization matrix that included assessing risk, audit readiness, and budgetary factors to evaluate the program's deferred maintenance strategic plan.

Health and Human Services (HHS)

- **Grants Management** | Monitored a portfolio of grantees to ensure all applicable documentation was on file and programmatic goals were met. This included reviewing applications for eligibility, issuing and revising notices of award, conducting compliance reviews, and providing direct technical support to the agency and grantees.
