POWER GENERATORS

GREEN POWER SYSTEMS

Green Power is a dynamic Italian company, leader in the design and production of generating sets. Green Power has reached a position of primary importance in both the Italian and international markets, thanks to its strengths among which the high quality and reliability of the products, the speed of delivery, the efficient and timely after-sales, the capillary and organized sales network globally.

PORTABLE POWER
1.5 - 11 kVA

RENTAL POWER
5 - 1250 kVA

MOBILE POWER
9 - 2500 kVA

MEGA POWER
300 - 3500 kVA

GREEN POWER RENTAL

The Green Power Rental generating set guarantees an easy movement and a quick maintenance and cleaning of the gen-set. It has been designed to minimize noise without taking away from compactness. It is complete with various standard accessories, like power sockets, water separator filter, oil pump, GALVA C4 treatment on the canopy, battery detached switch, analogic fuel level indicator and adjustable differential switch.

All this with the help of the power of the Green Stage V engines of the best international brands.

POWER STORAGE

The Green Power Energy Storage System is the ideal product for who wants to have the maximum performance at zero emissions and zero noise. The storage allows to accumulate the energy of the public mains from renewable energy sources or from a simple generator, and then reuse it when needed. You can use this system at any time of day or night without worrying about refueling, maintenance, noise and atmospheric emissions. It is the ideal system to have energy on construction sites, in the city center as the main source or to manage peak loads.

PUMPING SYSTEMS

IDROFOGLIA SYSTEMS

Idrofoglia Irrigation was established in 1979 as a manufacturing company of irrigation machines, motor pumps and electric pumps. The desire to extend its scope, has prompted the company to expand its range of solutions for water management for industry and construction, with new business divisions: Idrofoglia Dewatering, Idrofoglia Industry, Idrofoglia Fire Fighting and Pressurization.

SUBMERSIBLE PUMPS

24 - 360 mc/h

PORTABLE PUMPS

36 - 150 mc/h

SELF PRIMING PUMPS

150 - 1350 mc/h

DRY PRIME PUMPS

150 - 2000 mc/h

WET PRIME SERIES

Self-priming motor pumps built on frame with wheels and built-in tank, parking jacks, electric start with battery and engine protection control unit. Ideal for drainage and any other more demanding application on construction sites and in the industrial and emergency sectors. The pumping of more abrasive fluids with a high passage of solid parts is guaranteed by the robustness of the hydraulic system and the exclusive impeller, of the type with open blades and double curvature.

DRY PRIME SERIES

Professional dry-prime motor pumps with solids handling, on sled frame. In addition to the range of low-pressure motor pumps, we have introduced the mid-range and high-pressure premium quality pumps. The built-in depressor allows rapid priming and the possibility of pumping water even in the presence of a high percentage of air. Priming is also totally automatic and the pumps have the ability to work dry (without water). These heavy-duty motor pumps are equipped with Stage V engines to minimize emissions level.

WELL POINT SERIES
150 - 1350 mc/h

EMERGENCY SERIES
36 - 150 mc/h

LIGHTING TOWERS

AURORA LIGHTING TOWERS

Aurora Lighting Towers is a brand of Green Power Systems, which after twenty years of experience in the development of generators, today present in 126 countries around the world, has decided to use its know-how in creating a line of specific products for lighting towers and suitable mobile lighting systems to any type of need. **Contact us for solar powered options.**

BETA
Diesel

GAMMA
Battery and hybrid

ZETA
Portable

KAPPA
Petrol and portable

BETA

Our BETA is the top of the range of our lighting towers. Hydraulic lifting until 8,5m, homologated road trailer, parking brake, AMOSS Security System for the operator, 218h autonomy, very low noise level and Stage V engine standard. All this always with a great compactness. It can be used for the heavier jobs such as construction sites, events, civil protection.

ZETA

The Aurora ZETA lighting tower is the ideal product for illuminating without emissions and noise. Compactness, easy handling, zero emissions, zero noise, modularity, without maintenance, these are its main characteristics. It can be connected to the public mains, to a gen-set or to a any other energetic source.

OMEGA
Customizable

DELTA
Zero emission

MILITARY

MILITARY SECTOR GENERATORS

Green Power has also created a series of generators which meet the special requirements of the military sector. Besides the NATO coloured frames and canopies, the modifications to suit the military sector can include notched wheels, adapted height from the ground, mounted spare wheels and NATO rudder connections. Thanks to years of expertise, Green Power is able to install the generators onto containers which can be transported by helicopter or by plane.

MILITARY GENERATORS
Customizable on request

EMERGENCY

ALLIGATOR GLP

ALLIGATOR GLP was born from the desire to combine the fundamental tools to intervene quickly during natural disasters. Idrofoglia has combined a generator set, a self-priming electric pump and a lighting tower in a single machine equipped with a high-speed road trolley. The range includes standard models from 10 to 40 KVA, with self-priming electric pumps from 90 up to 350 m³ / h and lighting towers with LED lights.

EMACH MACHINERY

Emach was created to meet the demands of increasingly demanding customers and looking for quality domestic and professional products at competitive prices with the guarantee of forty years of experience in the energy and hydraulic sectors for industry and construction. The value of being leading builders in these sectors allows to convey the necessary experience and guaranteeing quality solutions also in this range of entry level professional products.

*Powerpartstore works closely with Antec.
Antec is our preferred partner for installing and professional
maintenance of both new and existing installations.
In addition, Antec can also help replace or repair individual parts
and spare parts of your installation.*
