- Key concepts, methodology & processes

## Includes :

- All slides & explanatory videos shown
- Interactive Q&A session
- Practical examples and recent regulatory updates

## Format :

- 1 full training day on-site
- Delivered by our two industry experts
- Escape Game to conclude the training

What to expect

*The escape game was a fun way to wrap up the training day while putting into practice what had been taught. What's more, it was even tailored to the company's field of activity!*

**Attendees from a Belgian company active in the aerospace sector (September 2025)**

What they say about it

*This training day allowed me to organize and structure the partial and scattered knowledge I already had in mind. It felt like finally connecting the dots, recovering the missing pieces of a puzzle, and seeing the bigger picture much more clearly.*
