GENERATOR POWER PACKS

GREEN POWER SYSTEMS

Our mobile generating sets are the perfect solution for anyone needing reliable power, anytime and anywhere. Customized for emergency situations, our Stage V range **from 5 to 1,500 kVA** delivers power and versatility without compromise. Designed with robust frames and silenced enclosures, our mobile generating sets offer excellent performance, easy transport, and low noise levels, making them ideal even for noise-sensitive environments. Components selected from the world's leading manufacturers ensure durability and reliability.

GREEN POWER RENTAL

The Green Power Rental generating set guarantees an easy movement and a quick maintenance and cleaning of the gen-set. It has been designed to minimize noise without taking away from compactness. It is complete with various standard accessories, like power sockets, water separator filter, oil pump, GALVA C4 treatment on the canopy, battery detached switch, analogic fuel level indicator and adjustable differential switch. All this with the help of the power of the Green Stage V engines of the best international brands.

POWER STORAGE

The Green Power Energy Storage System is the ideal product for who wants to have the maximum performance at zero emissions and zero noise. The storage allows to accumulate the energy of the public mains from renewable energy sources or from a simple generator, and then reuse it when needed. You can use this system at any time of day or night without worrying about refueling, maintenance, noise and atmospheric emissions. It is the ideal system to have energy on construction sites, in the city center as the main source or to manage peak loads.

PORTABLE POWER
1.5 - 11 kVA

RENTAL POWER
5 - 1250 kVA

MOBILE POWER
9 - 2500 kVA

MEGA POWER
300 - 3500 kVA

PORTABLE POWER STATION

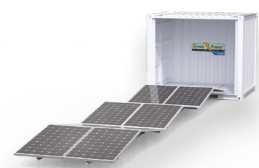

GREEN BATTERY POWER PACKS

The mission of this division is to provide the global market with **advanced energy solutions**, including hybrid systems, storage solutions, and photovoltaic solar technologies dedicated to power supply, pumping and water treatment. With a range from portable to containerized battery power, we have a solution for all mobile power demands.

PORTABLE POWER STATION

The Green Power Solar portable power station is an all-in-one battery-inverter energy storage system. It integrates a bidirectional inverter, MPPT solar charge controller, LiFePO₄ battery, BMS (Battery Management System), and multiple input/output interfaces in a compact, portable unit. Designed for outdoor activities, home backup power, and emergency use, it combines high output performance, UPS functionality, ultra-fast charging, and expandable battery capacity. Ideal for camping, travel, job sites, and power outages, the system can power a wide range of electrical devices while also supporting clean solar charging for reliable off-grid energy.

40.6 kW Solar Panel & 40kW / 60kWh Storage

75.6kW Solar Panel & 80kW / 241kWh Storage

151kW Solar Panel & 120kW / 483kWh Storage

600W 384WH

600W 512WH

2400W 2048WH

51.2V 40AH 2048WH

MOBILE WATER TREATMENT

MILITARY

MOBILE WATER TREATMENT

Trailer mounted or containerized seawater or freshwater mobile units, ready to use in Plug & Play mode to provide drinking water in remote areas. Containerized wastewater treatment plants with Active Sludge, SBR, MBBR and MBR technologies for water reuse.

MILITARY SECTOR GENERATORS

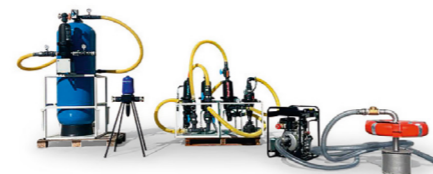

Green Power has also created a series of generators which meet the special requirements of the military sector. Besides the NATO coloured frames and canopies, the modifications to suit the military sector can include notched wheels, adapted height from the ground, mounted spare wheels and NATO rudder connections. Thanks to years of expertise, Green Power is able to install the generators onto containers which can be transported by helicopter or by plane.

LIGHTING TOWERS

SECURITY CAMERA TOWERS

AURORA LIGHTING TOWERS

Powerful, reliable, and easy-to-use lighting towers, designed to illuminate any situation: Emergency sites, temporary infrastructures, and more. Each solution combines high performance, efficiency, and versatility, delivering bright and uniform light even in the most challenging conditions. With **Green Power Lighting**, technology meets practicality: professional-grade performance, always ready when you need it.

SECURITY CAMERA TOWERS

Compact, powerful and flexible, the new hybrid power station allows you to set up and take security services wherever you want with LED headlamps and 360° IP camera with AI features.

EMERGENCY

EMERGENCY PUMP SYSTEMS

ALLIGATOR GLP

ALLIGATOR GLP was born from the desire to combine the fundamental tools to intervene quickly during natural disasters. Idrofoglia has combined a generator set, a self-priming electric pump and a lighting tower in a single machine equipped with a high-speed road trolley. The range includes standard models from 10 to 40 kVA, with self-priming electric pumps from 90 up to 350 m³ / h and lighting towers with LED lights.

EMERGENCY PUMP SYSTEMS

Self-priming motor pumps built on a frame with wheels and built-in tank, parking feet, electric start with battery and motor protection control unit. Ideal for drainage and any other more demanding application on construction sites and in the industrial and emergency sectors. The pumping of more abrasive fluids with high passage of solid bodies guaranteed by the robustness of the hydraulic system and the exclusive impeller, of the type with open blades and double curvature.

SUBMERSIBLE PUMPS
24 - 360 mc/h

PORTABLE PUMPS
36 - 150 mc/h

SELF PRIMING PUMPS
150 - 1350 mc/h

DRY PRIME PUMPS
150 - 2000 mc/h

Powerpartstore works closely with Antec.

Antec is our preferred partner for installing and professional maintenance of both new and existing installations. In addition, Antec can also help replace or repair individual parts and spare parts of your installation.
